ANNEX "F"

INTERIM ENVIRONMENTAL ASSESSMENT PROCESS

The Framework Agreement specifies that the First Nation and the Minister will address in the Individual Agreement how to conduct environmental assessments on First Nation land on an interim basis until the First Nation's environmental assessment process is developed. This Annex describes that interim environmental assessment process.

The interim process is intended to be broadly consistent with requirements of the federal environmental assessment process but without imposing requirements that are only appropriate to federal organizations and departments.

- 1) Zagimē shall carry out an environmental assessment in circumstances where federal environmental assessment legislation would likely require Canada to carry out an environmental assessment for a project on federal lands.
- 2) When Zagimē must conduct an environmental assessment of a proposed project, Zagimē shall ensure that the environmental assessment is carried out in the early planning stages of the project, before Zagimē makes an irrevocable decision that would allow the project to proceed (i.e. approve, regulate, fund or undertake the project). The environmental assessment shall be conducted at the expense of Zagimē or proponent of the project.
- 3) Zagimē shall not approve, regulate, fund, or undertake the project unless Zagimē has determined that:
 - a. the project is unlikely to cause any significant adverse environmental effects; or
 - b. that those effects are justifiable under the circumstances,taking into consideration:
 - the results of a required environmental assessment;
 - any economically and technically feasible mitigation measures identified as necessary during the assessment; and
 - any public comments received during the assessment.
- 4) If Zagimē approves, regulates, funds, or undertakes the project, Zagimē shall conduct project monitoring, review implementation of approved mitigation measures, and follow-up programs as Zagimē considers necessary.
- 5) If a project on Zagimē Anishinabēk Land is also subject to a federal or provincial environmental assessment process, Zagimē must make its own determination in accordance with Section 3 above, but may:
 - a. agree with the Province, Canada, or both on a harmonized environmental assessment process appropriate to that project,

RH

taking into account the Framework Agreement's principle that Zagimē's environmental assessment process be used where a federal environmental assessment is required; or

- b. use the environmental assessment completed by the Province, Canada, or both, in substitution for undertaking a Zagimē-led environmental assessment process.
